Shake it up! Damage from vibration is a leading cause of battery failure. Optima batteries have over 15 times more vibration resistance than traditional batteries due to patented Spiralcell Technology. Repetitive Reserve Capacity! Optima batteries have the ability to withstand significantly more discharge/recharge cycles and still accept a high percentage of original full capacity. More Starting Power! Optima batteries deliver a higher level of power to the starter in the critical first 10 seconds of the vehicle starting cycle.

Can't decide if you need the Yellow Top or Red Top?

You need the Optima Yellow Top if:

Your Vehicle has a lot of accessories like running lights, winches, hydraulics, or high-performance stereo/AV system. The Yellow Top will provide the extra performance and cycling capability that your vehicle needs.

You need the Optima Red Top if:

Your battery is used in vehicles that demand extra reliability and performance, or if you just take pride in getting the best performance out of your vehicle. The Red Top will provide the performance you need.
