service life, ODYSSEY® saves you time and money because you do not have to replace the battery as often. ODYSSEY® has the powersport exclusive 2-year full warranty against factory defects or three full years in automotive, commercial and heavy-duty marine.

SUPERIOR CRANKING AND FAST CHARGE CAPABILITY The 5 second cranking power of ODYSSEY® batteries is double to triple that of equally sized conventional batteries, even when the temperature is as low as -40°C . Also, with simple constant voltage charging (14.2-15V) (alternator or independent charger), there is no limitation on the in rush current, so the user is assured of fast charge recovery.

MOUNTING FLEXIBILITY The ODYSSEY® battery may be installed on its sides at any angle without sacrificing any performance attributes. There is no fear of any acid spillage as ODYSSEY® recycles the internal gas during operation or charging.

SUPERIOR VIBRATION RESISTANCE ODYSSEY® batteries are of military grade and have endured rigorous tests that demonstrate their overall ruggedness and exceptional tolerance of mechanical abuse.
